VIDEO CONTENTS

Disc 1

Basic Hepatic Anatomy and Techniques

Basic Hepatic Anatomy
* Basic Hepatic Anatomy—3D Model
* Vascular/Biliary Anomalies
  * Vascular
    * Aberrant Left Portal Vein
    * Congenital Portacaval Shunt
  * Biliary
    * Left-Sided Gallbladder
* Atrophy/Hypertrophy Complex of the Liver

Basic Techniques
* Inflow Control
* Outflow Control
* Parenchymal Transection
* Anterior Approach

Disc 2

Major Hepatic Resections—Right

Right Hepatectomy
* Overview of Right Hepatectomy
* Right Hepatectomy, Right Adrenalectomy, and Right Nephrectomy with Excision of Retroperitoneal Liposarcoma En Bloc
* Right Hepatectomy and Pericystectomy for Hydatid Disease
* Right Hepatectomy with Enucleation for Giant Hemangioma
* Right Hepatectomy Extended to Segment IVa and Hepatic Arterial Infusion Pump Placement for Metastatic Colorectal Cancer
* Right Hepatectomy for Hepatocellular Carcinoma (Anterior Approach Using the Hanging Maneuver)

Extended Right Hepatectomy (Right Lobectomy)
* Overview of Extended Right Hepatectomy (Right Lobectomy)
* Extended Right Hepatic Lobectomy for Fibrous Tumor of the Liver
* Extended Right Hepatic Lobectomy for Metastatic Colon Cancer with Portal Venous and Hilar Biliary Reconstruction
* Extended Right Hepatic Lobectomy for Hepatocellular Carcinoma
* Extended Right Hepatic Lobectomy and Caudate Lobectomy, with Excision of Portion of Inferior Vena Cava, for Hepatocellular Carcinoma
Video Contents

**Disc 3**

**Major Hepatic Resections—Left**

**LEFT HEPATECTOMY**
- Overview of Left Hepatectomy
- Left Hepatectomy Extended to Segment V for Metastatic Colorectal Cancer
- Left Hepatectomy Extended to Segment VIII for Metastatic Colorectal Cancer

**EXTENDED LEFT HEPATECTOMY**
- Overview of Extended Left Hepatectomy
- Extended Left Hepatic Lobectomy with Caudate Lobectomy
- Extended Left Hepatic Lobectomy for Hepatoblastoma Invading Left Portal Vein
- Extended Left Hepatic Lobectomy for Primary Liver Cancer
  (Please see Segmental Resections for Left Lobectomy)

**Disc 4**

**Segmental Resections and Wedge Resection**

**SEGMENTAL RESSECTION**
- Rationale for Segmental Resection
- Left Lobectomy (Left Lateral Segmentectomy)
  - Overview of Left Lobectomy (Left Lateral Segmentectomy)
  - Left Lateral Segmentectomy for Fibronodular Hyperplasia
  - Left Lateral Segmentectomy (Left Hepatic Lobectomy)
  - Left Lobectomy (Left Lateral Segmentectomy) for Ruptured Hepatocellular Carcinoma
- Caudate Lobectomy for Giant Hemangioma
- Mobilization of the Caudate Lobe (Segment I) for Resection During Extended Left Hepatectomy
- Resection of Segment I for Metastatic Colon Cancer
- Central Hepatic Resection for Metastatic Colon Cancer
- Central Hepatic Resection for Gastrinoma Involving the Right Anterior Sectoral Hepatic Duct
- Resection of Segment III for Metastatic Colon Cancer
- Resection of Segments IVb and V for Metastatic Colorectal Cancer
- Right Posterior Sectorectomy (Segments VI and VII)
- Hepatic Resection for Segments V and III

**WEDGE RESECTION**
- Wedge Resection of Segment VIII
- Cryo-Assisted Liver Resection
- Excision of Pedunculated Tumor of the Left Lobe

**Disc 5**

**Liver**

**CYSTS OF THE LIVER**
- Giant Simple Cyst of the Liver
- Subtotal Cystectomy and Drainage for Hydatid Disease
- Drainage (Capitonage) of a Hydatid Cyst of the Liver
- Right Hepatectomy and Pericystectomy for Hydatid Disease
- Resection/Fenestration for Polycystic Liver Disease
### Disc 6

**The Biliary Tract**

- Basic Techniques in Biliary Enteric Anastomosis
- Benign Biliary Disease
  - Gallstones
  - Exploration of the Common Bile Duct (Choledochoscopy)
  - Mirizzi Syndrome
  - Choledochal Cyst
  - Repair of Benign Bile Duct Stricture
- Malignant Biliary Disease, Gallbladder Cancer, and Hilar Cholangiocarcinoma
  - General Principles for Gallbladder and Hilar Cholangiocarcinoma
  - Biliary and Liver Resection for Cancer of the Gallbladder and Hilar Cholangiocarcinoma
  - Subhepatic Dissection with Lymphadenectomy for Gallbladder Cancer
  - Hepatic Resection (Segments IV and V) for Gallbladder Cancer
  - Cholecystectomy for Papillary Cancer of the Gallbladder
  - Resection of Hilar Cholangiocarcinoma
    - Excision of Bile Duct and Left Hepatectomy and Caudate Lobectomy En Bloc
    - Left Hepatic and Caudate Lobectomy En Bloc for Hilar Cholangiocarcinoma
    - Extended Right Hepatectomy and Caudate Lobectomy for Hilar Cholangiocarcinoma
    - Right Hepatic Lobectomy for Stricture of the Right Hepatic Duct
  - Biliary Bypass for Hilar Cholangiocarcinoma
    - Segment III Biliary Enteric Bypass, Including Anatomy of the Left Hepatic Duct
    - Segment III Biliary Enteric Bypass

### Disc 7

**Pancreas**

**Basic Anatomy**

**Basic Techniques**

- Pancreaticojejunostomy
- Biliary Ductal Anastomosis During Pancreatoduodenectomy
- Pancreaticogastrostomy
- Lateral Pancreaticojejunostomy
- Excision and Anastomosis of Portal Vein
- Excision and Anastomosis of Superior Mesenteric Vein During Pancreatoduodenectomy

**Pancreatic Resection**

- Cephalic Pancreatoduodenectomy
- Distal Pancreatectomy
- Central Pancreatectomy
- Total Pancreatectomy

**Ampullectomy**

- Ampullectomy for Ampullary Tumor
Disc 8

Laparoscopic Approaches

Introduction

Liver
- Technical Problems and Hazards
- Equipment and Instrumentation (Liver and Pancreas)
- Port Site Placement and Positioning of the Patient
- Anatomy of the Liver
- Indications and Contraindications
- Simple Hepatic Cysts
- Polycystic Liver Disease
- Biopsy of Liver Tumors
- Ablation of Liver Tumors
- Partial Hepatectomy
- Right Hepatectomy
- Left Lobectomy

Pancreas
- Introduction
- Positioning of the Patient and Port Site Placement
- Enucleation of a Pancreatic Tumor
- Distal Pancreatectomy and Splenectomy
- Spleen-Sparing Distal Pancreatectomy
